# **New generation of B&Bs are the latest hot trend in travel**

Alex Burns

## **Mint Croft Luxury B&B, Skye**

Rather than your own room, these suites are actually your own house – traditional Hebridean stone buildings that give a truly authentic island experience. Floor to ceiling windows give great views of the rugged landscape and make sure you feel fully in touch with nature. But fear not, tech lovers, each room has wifi, iPod docks and a flatscreen TV. After filling up on a two course breakfast, the hosts will then provide you with an ‘Explore the Island Kit’ (binoculars, maps and guides) to make sure you get the most of your stay.
